

ANIL CHANNAPPA JIRAGYALE

Full Stack AI Engineer | LLM & RAG Systems | Backend & API Development | React.js / Next.js

Personal & Professional Profile

Basic Information

Full Name	Anil Channappa Jiragyale
Date of Birth	10/07/2002
Birthday Celebrated On	10th January (commonly celebrated as 10-01)
Current Residence	Bangalore, Karnataka
Native Place	Anantapur, Athani, Karnataka - 591212
Phone	+91 9591585862
Email	aniljiragyale07@gmail.com
LinkedIn	linkedin.com/in/anil-jiragyale
GitHub	github.com/aniljiragyale
Portfolio	jiragyale-portfolio.vercel.app

Family Details

Father's Name	Channappa Jiragyale
Mother's Name	Shobha
Sibling	Akshay (Elder Brother)

Personality

Anil is an introverted person by nature. He generally does not believe in the idea of friendship easily, because of past experiences where people would only get in touch or stay connected when they needed some help or work done, and would reach out mainly for that reason. This pattern has made Anil cautious and guarded when it comes to trusting friendships. Despite this, he is focused, disciplined, and dedicated to his personal and professional growth.

Education

B.E. Computer Science & Engineering Fast Point College of Engineering and Technology, Bangalore
Feb 2020 - Present

Pre-University (PUC) - Science Ekalavya Science PU College, Harugeri, Karnataka
Jun 2018 - Mar 2020

Full Stack AI Engineer with enterprise experience building AI-powered platforms, LLM-integrated workflows, vector database systems, and scalable REST APIs at GSK GCC and Rokkun Systems. Delivered 3+ production platforms serving 100+ users, achieving a 30% improvement in query accuracy, ~40% reduction in manual effort, and enabling large-scale semantic search using Milvus, LangChain, and LangGraph. Proficient in React.js, Next.js, Python (FastAPI), PostgreSQL, AWS, Azure, RAG architecture, and prompt engineering.

Languages	Python, JavaScript (ES6+), Java, SQL
Frontend	React.js, Next.js, Tailwind CSS, HTML5, CSS3, Responsive UI Design
Backend	FastAPI, Spring Boot, REST APIs, Authentication, API Integration
AI / ML	LLM Integration, LangChain, LangGraph, RAG Architecture, Prompt Engineering, Semantic Search
Databases	PostgreSQL, MySQL, MongoDB, DuckDB, Milvus (Vector DB)
Cloud & DevOps	AWS, Azure App Service, Git, GitHub, Jenkins, CI/CD Pipelines, Linux, Postman
Data & BI	Power BI, Pandas, NumPy, Matplotlib, Data Visualization

Full Stack AI Engineer

- Architected an AI-powered market intelligence platform integrating news ingestion, semantic processing, and LLM-based retrieval pipelines using LangChain and LangGraph.
- Integrated Milvus vector database for large-scale semantic search across 10,000+ indexed documents.
- Built a semantic search tool with time-decay ranking and natural language time filtering, improving retrieval accuracy significantly.
- Reduced pipeline failure rate by ~35% through optimized data processing workflows.

- Engineered 2 production enterprise platforms (CDM Accelerator and CDM Intake) serving 100+ users
- Implemented LLM-powered query processing with RAG architecture, improving query resolution accuracy by 30% and reducing retrieval time by ~50%.
- Built ASK CDF, an AI chatbot for natural language querying of clinical documentation.
- Built Power BI dashboards tracking 15+ KPIs, improving decision speed for 3+ business teams.

- Developed and maintained 5+ MERN stack web application modules in an enterprise environment.
- Automated 3+ data processing workflows, reducing manual reporting effort by ~60%.
- Conducted automation testing with 50+ test cases, achieving zero critical regression defects.

Key Projects

- **Tariff Prediction Model** - AI/ML system using time-series forecasting to predict trade tariff outcomes (Rokkun System).
- **CDM Accelerator** - Enterprise AI Clinical Data Management platform with RAG chatbot, ER Extractor, and S2T Validator, deployed to 100+ users (GSK GCC).
- **CDM Intake** - Workflow automation platform reducing intake processing time by ~35% (GSK GCC).
- **Airline Reservation System** - Full-stack web app using React.js, Spring Boot, and MySQL supporting 500+ simulated bookings.
- **COVID-19 Spread Prediction** - ML model achieving 85% accuracy using LASSO Regression, ARIMA, and LSTM models.

Certifications

- AI with Machine Learning - Final Exam, Oracle Academy (Dec 2023)
- Step into RPA, UiPath Academy (Nov 2023)
- Big Data 101, IBM SkillsBuild (Dec 2023)
- Java Foundations - Final Exam, Oracle Academy (Oct 2022)
- Database Foundations, Oracle Academy (Nov 2023)
- Certified Python Developer Associate (CPDA-24), PDAC (Lifetime)
- Fundamentals of AI and ML, Infosys Springboard (Nov 2023)
- Java Engineer Hiring Challenge - Certificate of Excellence, TechGig / Persistent (Sep 2024)

Hobbies & Interests

- Aspires to become an Air Force Officer, a long-standing personal ambition.
- Enjoys cooking and experimenting with new recipes.
- Interested in reading about technology and exploring new AI tools and frameworks.
- Enjoys traveling to new places and exploring different cultures.

Likes, Dislikes & Favorites

Favorite Food	South Indian cuisine, especially spicy and home-style dishes
Favorite Color	Blue
Favorite Music	Kannada and Hindi melodies
Favorite Movies	Action and thriller genres
Dislikes	Superficial relationships and people who connect only for personal benefit

Languages Known

Languages Spoken	Kannada, English, Hindi
-------------------------	-------------------------

Goals & Future Plans

- Grow further as an AI Engineer, deepening expertise in LLMs, RAG systems, and scalable AI architectures.
- Work toward the ambition of becoming an Air Force Officer.

- Build and contribute to impactful AI-driven products that solve real-world problems.
- Continue learning new technologies and stay updated with advancements in AI and full-stack development.
